Dear Sue

Re - Your Letter Ref.SGC/roc/26.6.07

We write with reference to the above letter in which you informed us of the suspension of our Amway businesses.

You stated that your reason for taking this action was because you had information that we had broken an undertaking we signed on the 31st of May - agreeing to refrain from promoting any BSMs, including websites.

In our response - which you received on the 29th of June - it was explained that the website www.int-business-systems.com/whatwedo.htm was no longer owned by us. It was disabled by Mistral, the ISP on the 21st of March 2007 because we had developed a new website with another ISP. Our agreement with Mistral was terminated and we had written confirmation from Mistral informing us of the action they had taken.

All this took place well before Amway's announcements of the 4th of May. We therefore had no reason to even look at this website again. We cannot access this site to make changes so we have now written to Mistral asking them to remove any trace that is remaining for "legal reasons"

With regard to the second website www.jcircle.net we are not the owners and were completely unaware of its existence.

It has now been over seven days since you received our response, which clearly demonstrates that we have not broken our undertaking, signed on the 31st of May.

Can you therefore please confirm that the suspension of our Amway business has now been lifted and that we will receive our next bonus payment, which will be due later this month?

Yours Sincerely

Jerry & Mandy Scriven
